

Fortune Bay Corp.

MANAGEMENT'S DISCUSSION AND ANALYSIS
Six-month period ended June 30, 2020

Dated: August 28, 2020

Fortune Bay Corp.
Six-month period ended June 30, 2020

MANAGEMENT'S DISCUSSION AND ANALYSIS

This Management's Discussion and Analysis ("MD&A") provides a review of the performance of Fortune Bay Corp. (the "Company" or "Fortune Bay" or "Spinco") and should be read in conjunction with the unaudited condensed interim consolidated financial statements of Fortune Bay (the "Financial Statements") for the period ended June 30, 2020 and the audited consolidated financial statements of Fortune Bay for the years ended December 31, 2019 and 2018, which have been prepared in accordance with International Financial Reporting Standards ("IFRS").

The information presented in this MD&A is as of August 28, 2020. The reporting currency for the Company is the Canadian dollar. All of the financial information presented herein is expressed in Canadian dollars, unless otherwise stated. United States dollars are indicated by the symbol "US\$".

This MD&A contains "forward-looking statements" and "forward-looking information" within the meaning of applicable Canadian securities laws that are subject to risk factors set out herein. For further details see the sections in this MD&A titled "Cautionary Note regarding Forward-Looking Statements and Information" and "Risk Factors".

COMPANY OVERVIEW

The Company was incorporated on February 4, 2016 as 9617337 Canada Limited under the laws of the *Canada Business Corporations Act* as part of the transaction (the "Transaction") between kneat.com, inc. ("kneat.com"), Kneat Solutions Limited and the Company. Fortune Bay began trading on the TSX Venture Exchange ("TSX-V") as a new public company on July 4, 2016 under the symbol FOR. As at June 30, 2020, the Company's principal activity is the acquisition, exploration and development of mineral interests. To date, the Company has not generated any revenues from operations and is considered to be in the exploration stage.

On June 27, 2016, the Company completed the Transaction with kneat.com and Kneat Solutions Limited, pursuant to which kneat.com's resource properties and other net assets were spun-out to the Company by way of a court-approved plan of arrangement in Ontario (the "Arrangement").

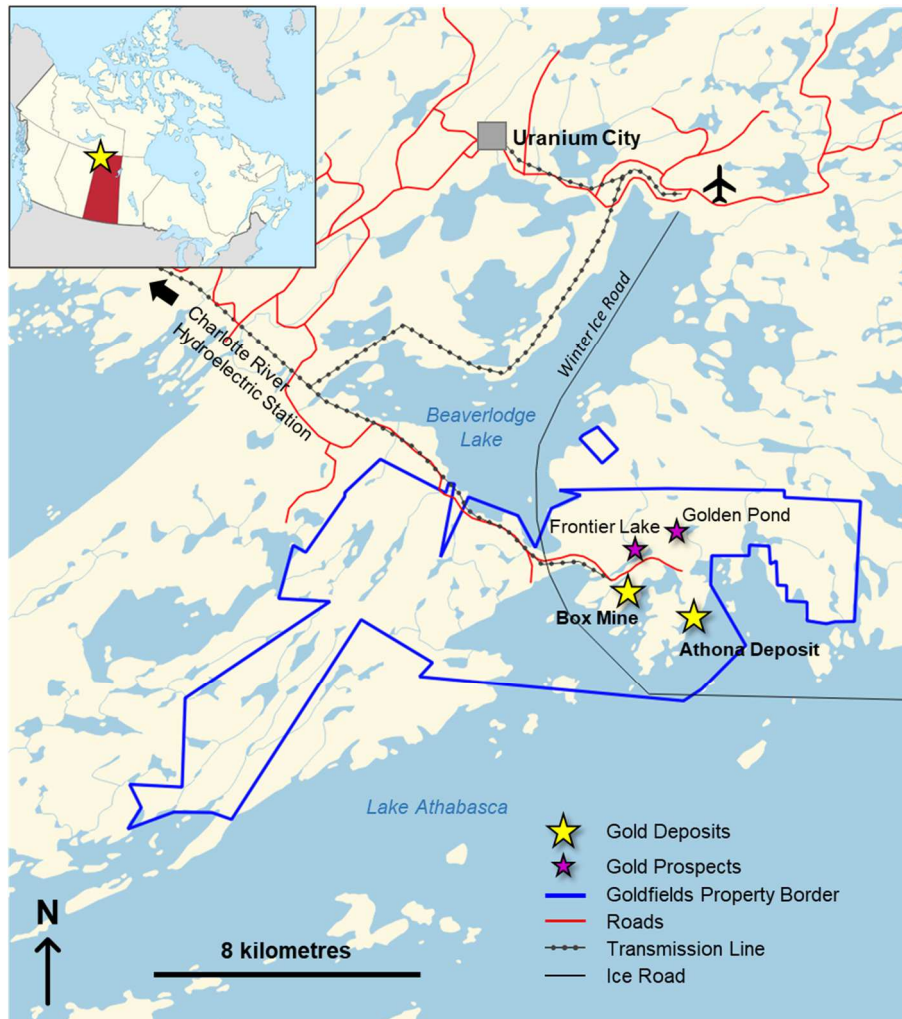

Pursuant to the Arrangement, shareholders of kneat.com as at the close of business on June 24, 2016 received one and one half common shares of Spinco (a "Spinco Share") in exchange for each three common shares of kneat.com held by them. Upon closing of the Transaction on June 27, 2016, shareholders of kneat.com as at the close of business on June 24, 2016 held 100% of the issued and outstanding Spinco Shares. The assets spun-out to Spinco consisted mainly of the interests in the Goldfields Project, the Ixuatán Project, the Huizopa Net Smelter Royalty ("NSR") in Mexico, and the NSR obtained from the sale of the Dominican Republic properties in 2014 (collectively, "The Exploration Properties Business of Fortune Bay").

OVERVIEW OF THE EXPLORATION PROPERTIES

Goldfields Project, Canada

The 100% owned Goldfields Project ("Goldfields" or the "Project") is the Company's most advanced property located in northern Saskatchewan, approximately 13 kilometres from Uranium City, and approximately 60 kilometres south of the Saskatchewan and Northwest Territories provincial boundary. Goldfields is host to the Box and Athona gold deposits and numerous other gold prospects and

occurrences. The Project is comprised of 18 mineral dispositions, covering approximately 9,500 hectares, which are all in good standing and protected from expiry with assessment credits until at least 2024. The Project is endowed with established infrastructure including existing roads, powerline, and nearby facilities and an airport at Uranium City.

An historical Pre-Feasibility Study (the “2011 PFS”) was completed for the Project in accordance with National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”) with an effective date of October 6, 2011. The 2011 PFS envisaged open-pit mining of the Box and Athona gold deposits, located two kilometres apart, over 13 years with estimated gold recoveries of 91% and 89% respectively, processed at a shared mill facility with a capacity of 5,000 tonnes per day. Economic highlights from the 2011 PFS include an NPV (at a 5% discount rate) of CAD\$144.3 million (pre-tax) and a 19.6% IRR (pre-tax) using a base case of CAD\$1,250/oz of gold (exchange rate CAD = 0.96 USD). Total capital costs were estimated at CAD\$159.2 million including a 13.7% contingency. Mineral reserve and mineral resource estimates for the 2011 PFS (Box and Athona deposits) included; 1.02 million ounces of gold (22.3 million tonnes at 1.4 g/t Au) in proven and probable reserves, 1.03 million ounces of gold (20.9 million tonnes at 1.5 g/t Au) in measured and indicated resources (included in the proven and probable reserves), and 0.23 million ounces of gold (4.6 million tonnes at 1.5 g/t Au) in inferred resources. The mineral resource and reserve estimates for the Project are considered historical in accordance with NI 43-101. For further details

regarding historical estimates, see the section in this MD&A titled 'Cautionary Note regarding Historical Mineral Resource and Reserve Estimates'.

The Project has a history of gold production (64,000 oz Au produced between 1935 to 1942), numerous exploration drilling campaigns (~80,000 metres of drilling in ~675 drill holes) and various mining studies (including a 2007 Feasibility Study for the Box deposit prepared for GLR Resources Inc. in accordance with NI 43-101). The Box open-pit mine and mill development is permitted having received Ministerial approval under the Environmental Assessment Act in May 2008. The Project presents numerous exploration opportunities, including the potential to expand the Box and Athona deposits and discover additional resources at several other gold prospects and occurrences.

Franco-Nevada Corporation has a 2% NSR for the Box and Athona deposits. The royalty covers an area of interest 16 kilometres from the external property boundaries of the Box, Athona, Fish Hook and Nicholson Bay claims. The Box area is also subject to a 1.5% NSR on all production beneath the 50 metres below mean sea level elevation on the original Cominco mining claims. This royalty does not apply to the 2011 PFS Box mine plan as the open pit designed does not extend to this depth.

During the period ended June 30, 2020, the Company incurred resource property expenditures of \$15,550 on the Goldfields Project, related to maintenance of the properties.

Additional information for the Project is available in the most recent NI 43-101 Technical Report, effective date March 19, 2016, found under the Company's profile on www.sedar.com.

Ixhuatán Project, Mexico

Fortune Bay has a 100% ownership interest in the Ixhuatán Project, which consists of the 4,176 hectare Rio Negro concession in northern Chiapas State, Mexico. The Rio Negro concession is valid until May 10, 2051. The Ixhuatán Project is located immediately southwest of the Santa Fe mine and is accessible by roads running five kilometres east of the town of Rayon, Chiapas. Rayon is situated 120 kilometres south of Villahermosa, Tabasco State. The Ixhuatán Project is an exploration project which hosts the Campamento gold-silver deposit, the Cerro La Mina gold-copper-silver prospect, and numerous other exploration targets.

A mineral resource estimate was completed for the Campamento deposit in accordance with NI 43-101 with an effective date of June 22, 2006. At a cut-off grade of 0.5 g/t gold, the estimate includes measured and indicated mineral resources of 1.04 million ounces of gold (17.6 million tonnes at 1.8 g/t Au) and 4.4 million ounces of silver (17.6 million tonnes at 7.8 g/t Ag), and inferred mineral resources of 0.7 million ounces of gold (21.8 million tonnes at 1.0 g/t Au) and 2.3 million ounces of silver (21.8 million tonnes at 3.2 g/t Ag). The mineral resource estimate is considered historical in accordance with NI 43-101. For further details regarding historical estimates, see the section in this MD&A titled 'Cautionary Note regarding Historical Mineral Resource and Reserve Estimates'.

The Company incurred \$59,962 of expenditures on this property during the period ended June 30, 2020 related to title renewals and ongoing maintenance of the Ixhuatán Project. The Company is currently considering various options to advance the Ixhuatán Project.

Other

The Huizopa Project is located in the Sierra Madres in Chihuahua, Mexico. The Company has a 2% NSR over future production from the Huizopa Project. The Company also has the right to a production bonus of US\$4.0 million payable over two years from the date commercial production commences at Huizopa, as well as the right to 20% of the proceeds of disposal of Huizopa if it is disposed of prior to reaching commercial production. All consideration is contingent on the future development of the property. The Company considers the fair value of this consideration to be \$nil. There is no value assigned to the NSR in the financial statements of the Company.

The Company also holds an NSR on exploration properties in the Dominican Republic: the Ampliación Pueblo Viejo, Ponton and La Cueva properties. These properties were sold by the Company to an unrelated third party in 2014. The NSR is equal to 1.0% when the price of gold is less than US\$1,000 per ounce, 1.5% when the price of gold is between US\$1,000 and USD\$1,400 per ounce, and 2% when the price of gold is above US\$1,400 per ounce. The Company has assigned a value of \$nil to the NSR.

In connection with the sale of these properties in the Dominican Republic, the Company also received a promissory note equal to the greater of \$5.0 million or 1 million common shares of the purchaser. The promissory note is subject to the completion of a NI 43-101 compliant measured and indicated resource estimate on these concessions of a minimum of one million ounces of gold equivalent (at an average grade of 2.5 grams per tonne ("gpt") or higher for Ampliación Pueblo Viejo and 1.5 gpt or higher for Ponton and La Cueva) or actual gold production from these concessions plus a NI 43-101 compliant measured and indicated resource estimate on these concessions (at an average grade of 2.5 gpt gold equivalent for Ampliación Pueblo Viejo and 1.5 gpt gold equivalent or higher for Ponton and La Cueva) exceeding one million ounces of gold equivalent. The Company has assigned a value of \$nil to the promissory note.

2020 RECENT ANNOUNCEMENTS

On May 7, 2020, the Company announced it had closed its non-brokered private placement for aggregate gross proceeds of \$2,750,000. The Company issued 7,857,144 units at an issue price of \$0.35 per unit, with each unit comprised of one common share and one-half common share purchase warrant. Each whole warrant is exercisable into one common share of the Company at an exercise price of \$0.50 per share for a period of three years. Directors of the Company subscribed for an aggregate of 1,428,572 units.

On May 14, 2020, the Company announced the appointment of Mr. Dale Verran as its new Chief Executive Officer ("CEO") effective June 15, 2020. Mr. Verran has over twenty years of experience in the mining and mineral exploration industry in Canada and internationally, including fifteen years in executive management roles at private and public companies. Mr. Wade Dawe has stepped down as CEO effective June 15, 2020 and continues with the Company as Chairman. Mr. Dawe has led Fortune Bay and its predecessor companies through a number of value-enhancing transactions since 2003 and will continue to provide leadership through his position as Chairman.

On June 16, 2020, the Company announced that the Board of Directors of the Company approved the granting of 500,000 incentive stock options pursuant to the Company's Stock Option Plan to Mr. Dale Verran. These options are exercisable at a price of \$0.79 per share and expire on June 15, 2025 with 250,000 of the Options vesting over a three-year period and 250,000 of the Options vesting based on certain performance criteria being met.

On July 28, 2020, the Company announced plans for the second half of 2020 to advance the Goldfields Project. Plans included; 1) mineral resource modelling and estimation, with the objective of completing an updated mineral resource estimate before the end of Q1 2021 to verify the historical estimate and classify current mineral resources in accordance with NI 43-101, 2) resource expansion and exploration drill planning, to design a drill program to expand the known mineral resources at the Box and Athona deposits, and 3) project development review and planning, commencing with review and validation of the historical 2011 PFS to identify opportunities, risks and any potential data gaps in preparation for a future updated pre-feasibility study.

SELECTED ANNUAL INFORMATION

Expressed in thousands of Canadian dollars and prepared in accordance with IFRS:

	2019	2018	2017
	\$	\$	\$
Net loss for the year	(614)	(742)	(661)
Comprehensive loss for the year	(614)	(742)	(661)
Total assets	15,570	15,469	15,148
Total liabilities	1,097	425	343
Cash dividends per common share	N/A	N/A	N/A

The Company expects to record losses until such time as an economic resource is developed and exploited on one or more of the Company's exploration properties. The Company's net loss could be significantly affected by any impairment, reversal of impairment or abandonment of any resource property.

RESULTS OF OPERATIONS

Six-month period ended June 30, 2020

The Company recorded a net loss before income tax of \$341,262 during the six-month period ended June 30, 2020, an increase of approximately \$78,000 over the six-month period ended June 30, 2019. The increase was primarily a result of higher professional fees related to audit and legal costs and approximately \$23,000 of finance fees and interest for the current period. The finance fees and interest were incurred on the related party loan balance and amounts drawn during the current period. Salaries and benefits increased during the period due to the recruitment and hiring of a new CEO in June 2020.

Share-based compensation during the current period was \$63,956 compared to the prior period amount of \$27,927, an increase of approximately \$36,000 due to the issuance of new options during the period.

The Company recorded a net deferred income tax expense of \$75,747 for the period ended June 30, 2020, compared to a deferred income tax expense of \$8,470 during the period ended June 30, 2019. The deferred income tax expense relates to the difference between the book value and the tax value of the Company's exploration and development properties in Mexico.

A foreign exchange loss of \$9,635 was recorded for the current period, compared to a foreign exchange loss of \$2,878 during the prior period. The Company expects to continue incurring foreign exchange gains and losses arising from fluctuations in the value of the United States dollar and the Mexican peso relative to the Canadian dollar.

Three-month period ended June 30, 2020

The Company recorded a net loss before income tax of \$192,976 during the three-month period ended June 30, 2020, an increase of approximately \$61,000 over the three-month period ended June 30, 2019. The increase was primarily a result of higher salaries and benefits during the current quarter due to the recruitment and hiring of the Company's new CEO, as well as an increase of approximately \$40,000 in share-based compensation due to the issuance of new options during the current quarter. Finance fees and interest increased approximately \$5,000 over the prior year as interest was incurred on the Company's related party loan. The loan incurs lending fees of 4% on each draw and accrues annual interest of 12%.

The Company recorded a net deferred income tax recovery of \$1,993 for the period ended June 30, 2020 compared to a deferred income tax expense of \$2,624 during the period ended June 30, 2019. The deferred income tax expense relates to the difference between the book value and the tax value of the Company's exploration and development properties in Mexico.

A foreign exchange loss of \$3,388 was recorded for the current period, compared to a foreign exchange gain of \$1,342 during the prior period. The Company expects to continue incurring foreign exchange gains and losses arising from fluctuations in the value of the United States dollar and the Mexican peso relative to the Canadian dollar.

SUMMARY OF QUARTERLY RESULTS

Expressed in thousands of dollars, except per share amounts:

	Q2 2020	Q1 2020	Q4 2019	Q3 2019	Q2 2019	Q1 2019	Q4 2018	Q3 2018
	\$	\$	\$	\$	\$	\$	\$	\$
Net loss for the period	(191)	(226)	(214)	(128)	(135)	(137)	(333)	(120)
Basic & diluted net loss per share	(0.01)	(0.01)	(0.01)	(0.01)	(0.01)	(0.01)	(0.02)	(0.01)
Total assets	17,561	15,623	15,570	15,543	15,458	15,445	15,469	15,548
Total liabilities	913	1,365	1,097	867	658	523	425	188
Cash dividends per common share	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

Quarterly results are not cyclical or seasonal, with fluctuations in net loss related primarily to changes in professional fees, salaries or administrative costs, as well as foreign exchange.

LIQUIDITY AND CAPITAL RESOURCES

The Company's liquidity depends on existing cash reserves, supplemented as necessary by asset dispositions, equity and/or debt financings. As of June 30, 2020, the Company had cash on-hand of approximately \$1,943,000, compared to approximately \$23,000 as at December 31, 2019.

During the period ended June 30, 2020, the Company used cash of approximately \$453,000 to fund operating activities and \$77,000 on resource property expenditures, relating primarily to title renewals and maintenance of the Goldfields and Ixhuatán Projects. The Company also drew down on its loan from a related company that is co-owned by a director and officer of the Company for cash proceeds of \$111,500 and repaid cash on the loan of \$190,580. The loan is due on demand, incurs lender fees of 4%, and accrues interest at a rate of 12% per annum.

On May 7, 2020, the Company completed a private placement financing of 7,857,144 units for aggregate gross proceeds of \$2,750,000. Each unit was comprised of one common share and one-half common share purchase warrant. Each whole warrant will be exercisable into one common share of the Company at an exercise price of \$0.50 per share for a period of three years. Directors of the Company subscribed for 1,428,572 units pursuant to the financing. In addition, a finder's fee was paid to Numus Capital Corp., a company owned by an officer and director of Fortune Bay. The finder's fee consisted cash of \$192,500, or 7% of the gross proceeds of the financing, and 550,000 common share purchase warrants that are exercisable into 550,000 common shares of the Company at an exercise price of \$0.50 per share for a period of three years. All securities issued pursuant to the private placement are subject to a four-month hold period in accordance with Canadian securities legislation.

The Company does not have sufficient financial resources to undertake the complete development of its exploration properties without further inputs of financial resources. Development of the exploration properties will therefore depend on the Company's existing cash on-hand and its ability to obtain additional financing through means such as joint ventures, debt financings, equity financings, or other means. The reader should refer to the "Going Concern" disclosure under the Risk Factors section of this MD&A and Note 1 of the audited consolidated financial statements for the years ended December 31, 2019 and 2018.

COMMITMENTS AND CONTINGENCIES

In the normal course of business, the Company enters into contracts that give rise to commitments for future minimum payments. The following table summarizes the remaining contractual maturities of the Company's financial liabilities. The amounts included in this table may not result in an actual obligation of the Company, as the requirement to settle certain of these amounts is contingent on the occurrence of certain events that may or may not transpire:

	Payments due by period as of June 30, 2020				Total
	Within 1 year	2-3 years	4-5 years	Over 5 years	
	\$	\$	\$	\$	\$
Accounts payable and accrued liabilities	328,449	-	-	-	328,449
Loan payable	190,580	-	-	-	190,580
	519,029	-	-	-	519,029

As at June 30, 2020 and December 31, 2019, the Company has a services agreement with Numus for the provision of controller services, rent and other offices costs at a fee of \$32,400 per year, continuing until both parties mutually agree to terminate the agreement or either party provide at least six months notice.

The Company has employment arrangements with the CEO and Chief Financial Officer of the Company which provide that, should a change in control event occur, the Chief Executive Officer will receive a lump sum payment equal to between 24 and 36 months of his then current base salary and the Chief Financial Officer will receive a lump sum payment equal to 12 months of her then current base salary. In the event of a change of control, the Executive Chairman will receive a lump sum payment of 72 months of his current base compensation.

OFF-BALANCE SHEET ARRANGEMENTS

At June 30, 2020, the Company had no off-balance sheet arrangements such as guarantee contracts, contingent interest in assets transferred to an entity, derivative instruments obligations or any obligations that trigger financing, liquidity, market, or credit risk to the Company.

OUTSTANDING SHARE INFORMATION

The Company has authorized an unlimited number of common shares without par value. As of June 30, 2020, the Company had 28,894,407 common shares outstanding and as of August 28, 2020 the Company had 29,019,407 common shares outstanding following the exercise of 125,000 warrants.

As of June 30 and August 28, 2020, the Company had 1,925,000 stock options outstanding, exercisable into common shares of the Company at a weighted-average exercise price of \$0.49. 1,000,000 of the options expire on July 11, 2021, 175,000 expire on March 5, 2023, 250,000 expire on October 11, 2024, and 500,000 expire on June 15, 2025.

As of June 30, 2020, the Company had 6,937,635 warrants outstanding. 2,287,500 warrants are exercisable at a price of \$0.60 per share and expire on February 22, 2021. 171,563 warrants are exercisable at a price of \$0.40 per share and expire on February 22, 2021. 4,478,572 warrants are exercisable at a price of \$0.50 per share and expire on May 7, 2023. Subsequent to June 30, 2020, 125,000 warrants were exercised at a price of \$0.60, leaving 6,812,635 warrants outstanding at August 28, 2020.

RELATED PARTY TRANSACTIONS

Amounts payable to officers, directors and companies owned thereby were \$419,126 as at June 30, 2020 (December 31, 2019 - \$666,365), including a loan payable to a related company of \$190,580. During the six-month period ended June 30, 2020, the Company incurred costs for controller services from a related company controlled by a director and officer of the Company, Numus Financial Inc. ("Numus"), in the amount of \$6,000, incurred rent and office costs in the amount of \$15,150 and recognized other cost reimbursements from Numus of \$1,923. During the year ended December 31, 2019, the Company incurred costs for controller services from Numus of \$12,000 and incurred net rent and office costs in the amount of \$31,038 and recognized other cost reimbursements from Numus of \$4,431. As at June 30, 2020, the net amount payable by the Company to Numus was \$72,086 (December 31, 2019 - \$75,988). \$25,057 was repaid to Numus during the period ended June 30, 2020.

During the year ended December 31, 2019, the Company entered into a loan agreement with a related company that is co-owned by a director and officer of the Company. Refer to Note 7 of the unaudited condensed interim consolidated financial statements for details of the loan terms. During the six-month period ended June 30, 2020, \$115,960 was drawn on the loan, including a lender fee of \$4,460, and the Company repaid \$190,580, including lender fees of \$7,330. As at June 30, 2020, the balance of the loan was \$190,580, plus interest payable of \$4,537 (December 31, 2019 - \$265,200 plus interest payable of

\$6,809). The loan is being used to fund exploration and evaluation asset expenditures and operating costs.

During the period ended June 30, 2020, the Company completed a private placement financing of 7,857,144 units for aggregate gross proceeds of \$2,750,000. Directors of the Company subscribed for 1,428,572 units pursuant to the financing. In addition, a finder's fee was paid to Numus Capital Corp., a company co-owned by an officer and director of Fortune Bay. The finder's fee consisted cash of \$192,500, or 7% of the gross proceeds of the financing, and 550,000 common share purchase warrants that are exercisable into 550,000 common shares of the Company at an exercise price of \$0.50 per share for a period of three years.

The key management of the Company includes the CEO, the CFO and the Company's Directors.

FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Credit Risk

Credit risk on financial instruments arises from the potential for counterparties to default on their obligations to the Company.

The Company's maximum exposure to credit risk is represented by the carrying amount of the Company's cash and accounts receivable. Cash is placed with high-credit quality financial institutions. The fair value of accounts receivable approximates their carrying value due to their relatively short periods to maturity. There are no material financial assets that the Company considers to be past due.

At each reporting period, the Company assesses whether there has been an impairment of financial assets. The Company has not recorded an impairment on any financial assets during the period ended June 30, 2020.

Liquidity Risk

Liquidity risk is the risk that the Company will not meet its financial obligations as they become due. The Company has a planning and budgeting process to monitor operating cash requirements, including amounts projected for the existing capital expenditure program and plans for expansion, which are adjusted as input variables change. These variables include, but are not limited to, funding requirements of mineral properties, general and administrative requirements and the availability of capital markets. As these variables change, liquidity risks may necessitate the need for the Company to issue equity or obtain debt financing. Accounts payable and accrued liabilities are paid in the normal course of business generally according to their terms.

Currency Risk

The Company is exposed to currency risk on its United States dollar and Mexican peso cash, accounts receivable, and accounts payable and accrued liabilities, in addition to certain of its operating costs. For the period ended June 30, 2020, changes in the exchange rate between the aforementioned currencies and the Canadian dollar would not have impacted the Company's net loss by a material amount, as the balance of funds held, receivable, or owing in these currencies was not material. The Company does not hedge its currency risk, as the currency risk is considered minimal.

RISK FACTORS

Mineral exploration companies face many and varied risks. The principal activity of the Company is mineral exploration, which is inherently risky. Exploration is also capital intensive, and the Company currently has no source of income other than interest income.

The following are the risk factors which the Company's management believes are most important in the context of the Company's business. It should be noted that this list is not exhaustive and that other risk factors may apply.

Limited Business History

Fortune Bay has a short history of operations and has no history of earnings. The likelihood of success of Fortune Bay must be considered in light of the problems, expenses, difficulties, complications and delays frequently encountered in connection with the establishment of any business. Fortune Bay has limited financial resources and there is no assurance that funding will be available to it when needed. There is also no assurance that Fortune Bay can generate revenues, operate profitably, provide a return on investment, or that it will successfully implement its plans.

Going Concern

The Company's ability to continue as a going concern is dependent upon its ability to fund its working capital and exploration requirements and eventually to generate positive cash flows, either from operations or sale of properties. The Company will actively seek financing from time to time to finance its operations, however the ability, availability and timing of such financing is not certain. The Company's financial statements do not reflect the adjustments to the carrying value of assets and liabilities and the reported expenses and balance sheet classifications that would be necessary were the going concern assumption inappropriate, and these adjustments could be material.

Unknown Environmental Risks for Past Activities

Exploration and mining operations incur risks of releases to soil, surface water and groundwater of metals, chemicals, fuels, liquids having acidic properties and other contaminants. In recent years, regulatory requirements and improved technology have significantly reduced those risks. However, those risks have not been eliminated, and the risk of environmental contamination from present and past exploration or mining activities exists for mining companies. Companies may be liable for environmental contamination and natural resource damages relating to properties that they currently own or operate or at which environmental contamination occurred while or before they owned or operated the properties. No assurance can be given that potential liabilities for such contamination or damages caused by past activities at Fortune Bay's exploration properties do not exist.

Acquisitions and Joint Ventures

Fortune Bay will evaluate from time to time opportunities to acquire or joint venture mining assets and businesses. These acquisitions and joint ventures may be significant in size, may change the scale of Fortune Bay's business and may expose it to new geographic, political, operating, financial and geological risks. Fortune Bay's success in its acquisition and joint venture activities will depend on its ability to identify suitable acquisition and joint venture candidates and partners, acquire or joint venture them on acceptable terms and integrate their operations successfully with those of Fortune Bay. Any acquisitions or joint ventures would be accompanied by risks, such as the difficulty of assimilating the operations and

personnel of any acquired companies; the potential disruption of Fortune Bay's ongoing business; the inability of management to maximize the financial and strategic position of Fortune Bay through the successful incorporation of acquired assets and businesses or joint ventures; additional expenses associated with amortization of acquired intangible assets; the maintenance of uniform standards, controls, procedures and policies; the impairment of relationships with employees, customers and contractors as a result of any integration of new management personnel; dilution of Fortune Bay's present shareholders or of its interests in its subsidiaries or assets as a result of the issuance of shares to pay for acquisitions or the decision to grant earning or other interests to a joint venture partner; and the potential unknown liabilities associated with acquired assets and businesses. There can be no assurance that Fortune Bay would be successful in overcoming these risks or any other problems encountered in connection with such acquisitions or joint ventures. There may be no right for shareholders to evaluate the merits or risks of any future acquisition or joint venture undertaken except as required by applicable laws and regulations.

Uncertainty of Mineral Resource Estimates

Mineral resource figures are only estimates. Such estimates are expressions of judgment based on knowledge, mining experience, analysis of drilling results, and industry practices. While Fortune Bay believes that the mineral resource estimates included are established and reflect management's best estimates, the estimating of mineral resources is a subjective process, and the accuracy of mineral resource estimates is a function of the quantity and quality of available data, the accuracy of statistical computations, and the assumptions used and judgments made in interpreting available engineering and geological information. There is significant uncertainty in any mineral resource estimate, and the actual deposits encountered and the economic viability of a deposit may differ materially from Fortune Bay's estimates. Estimated mineral resources may have to be re-estimated based on changes in gold prices, further exploration or development activity or actual production experience. This could materially and adversely affect estimates of the volume or grade of mineralization, estimated recovery rates or other important factors that influence mineral resource estimates. Mineral resources are not mineral reserves and there is no assurance that any mineral resource estimate will ultimately be reclassified as proven or probable mineral reserves. Mineral resources which are not mineral reserves do not have demonstrated economic viability.

Economics of Developing Mineral Properties

Mineral exploration and development is speculative and involves a high degree of risk. While the discovery of an ore body may result in substantial rewards, few properties which are explored are commercially mineable and ultimately developed into producing mines. There is no assurance that Fortune Bay's gold deposits are commercially mineable.

Should any mineral resources and reserves exist, substantial expenditures will be required to confirm mineral reserves which are sufficient to commercially mine and to obtain the required environmental approvals and permitting required to commence commercial operations. The decision as to whether a property contains a commercial mineral deposit and should be brought into production will depend upon the results of exploration programs and/or feasibility studies, and the recommendations of duly qualified engineers and/or geologists, all of which involves significant expense. This decision will involve consideration and evaluation of several significant factors including, but not limited to: (a) costs of bringing a property into production, including exploration and development work, preparation of production feasibility studies and construction of production facilities; (b) availability and costs of financing; (c) ongoing costs of production; (d) gold prices, which are historically cyclical; (e) environmental compliance regulations and restraints (including potential environmental liabilities associated with historical

exploration activities); and (f) political climate and/or governmental regulation and control. Development projects are also subject to the successful completion of engineering studies, issuance of necessary governmental permits, and availability of adequate financing. Development projects have no operating history upon which to base estimates of future cash flow.

The ability to sell and profit from the sale of any eventual mineral production from any property will be subject to the prevailing conditions in the minerals marketplace at the time of sale. The global minerals marketplace is subject to global economic activity and changing attitudes of consumers and other end-users' demand for mineral products. Many of these factors are beyond the control of a mining company and therefore represent a market risk which could impact the long term viability of the Company and its operations.

Factors Beyond the Control of Fortune Bay

The potential profitability of mineral properties is dependent upon many factors beyond Fortune Bay's control. For instance, world prices of and markets for minerals are unpredictable, highly volatile, potentially subject to governmental fixing, pegging and/or controls and respond to changes in domestic, international, political, social and economic environments. Another factor is that rates of recovery of minerals from mined ore (assuming that such mineral deposits are known to exist) may vary from the rate experienced in tests and a reduction in the recovery rate will adversely affect profitability and, possibly, the economic viability of a property. Profitability also depends on the costs of operations, including costs of labour, equipment, electricity, environmental compliance or other production inputs. Such costs will fluctuate in ways Fortune Bay cannot predict and are beyond Fortune Bay's control, and such fluctuations will impact on profitability and may eliminate profitability altogether. Additionally, due to worldwide economic uncertainty, the availability and cost of funds for development and other costs have become increasingly difficult, if not impossible, to project. These changes and events may materially affect the financial performance of Fortune Bay.

Regulatory Requirements

The current or future operations of Fortune Bay, including development activities and possible commencement of production on its properties, requires permits from various federal and local governmental authorities, and such operations are and will be governed by laws and regulations governing prospecting, development, mining, production, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, environmental protection, mine safety and other matters. Companies engaged in the development and operation of mines and related facilities generally experience increased costs and delays in production and other schedules as a result of the need to comply with the applicable laws, regulations and permits. There can be no assurance that all permits which Fortune Bay may require for the development and construction of mining facilities and conduct of mining operations will be obtainable on reasonable terms or that such laws and regulations would not have an adverse effect on any mining project which Fortune Bay might undertake.

Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of the mining activities and may have civil or criminal fines or penalties imposed upon them for violation of applicable laws or regulations.

Amendments or changes to current laws, regulations, government policies, and permits governing operations and activities of mining companies, or more stringent implementation thereof, could have a material adverse impact on Fortune Bay and cause increases in costs or require abandonment or delays in the development of new mining properties.

The development of mines and related facilities is contingent upon governmental approvals that are complex and time consuming to obtain and which, depending upon the location of the project, involve multiple governmental agencies. The duration and success of such approvals are subject to many variables outside Fortune Bay's control. Any significant delays in obtaining or renewing such permits or licenses in the future could have a material adverse effect on Fortune Bay.

Insurance

Fortune Bay's business is capital intensive and subject to a number of risks and hazards, including environmental pollution, accidents or spills, industrial and transportation accidents, labour disputes, changes in the regulatory environment, natural phenomena (such as inclement weather conditions, earthquakes, pit wall failures and cave-ins) and encountering unusual or unexpected geological conditions. Many of the foregoing risks and hazards could result in damage to, or destruction of: Fortune Bay's mineral properties or future processing facilities, personal injury or death, environmental damage, delays in or interruption of or cessation of their exploration or development activities, delay in or inability to receive regulatory approvals to transport their gold concentrates, or costs, monetary losses and potential legal liability and adverse governmental action. Fortune Bay may be subject to liability or sustain loss for certain risks and hazards against which they do not or cannot insure or which it may reasonably elect not to insure because of the cost. This lack of insurance coverage could result in material economic harm to Fortune Bay.

Environmental Risks and Hazards

All phases of Fortune Bay's operations are subject to environmental regulation in the jurisdictions in which it operates. These regulations mandate, among other things, the maintenance of air and water quality standards and land reclamation. They also set forth limitations on the general, transportation, storage and disposal of solid and hazardous waste. Environmental legislation is evolving in a manner which will require stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects and a heightened degree of responsibility for companies and their officers, directors and employees. There is no assurance that future changes in environmental regulation, if any, will not adversely affect Fortune Bay's operations. Environmental hazards may exist on the properties which are unknown to Fortune Bay at present and which have been caused by previous or existing owners or operators of the properties. Reclamation costs are uncertain and planned expenditures estimated by management may differ from the actual expenditures required.

Fortune Bay is not insured against most environmental risks. Insurance against environmental risks (including potential liability for pollution and other hazards as a result of the disposal of waste products occurring from exploration and production) has not been generally available to companies within the industry. Fortune Bay will periodically evaluate the cost and coverage of the insurance against certain environmental risks that is available to determine if it would be appropriate to obtain such insurance.

Without such insurance, and if Fortune Bay becomes subject to environmental liabilities, the payment of such liabilities would reduce or eliminate its available funds or could exceed the funds Fortune Bay has to pay such liabilities and result in bankruptcy. Should Fortune Bay be unable to fund fully the remedial

cost of an environmental problem, Fortune Bay might be required to enter into interim compliance measures pending completion of the required remedy.

Costs of Land Reclamation Risk

It is difficult to determine the exact amounts which will be required to complete all land reclamation activities in connection with the properties in which Fortune Bay holds an interest. Reclamation bonds and other forms of financial assurance represent only a portion of the total amount of money that will be spent on reclamation activities over the life of a mine. Accordingly, it may be necessary to revise planned expenditures and operating plans in order to fund reclamation activities. Such costs may have a material adverse impact upon the financial condition and results of operations of Fortune Bay.

No Assurance of Title to Property

There may be challenges to title to the mineral properties in which Fortune Bay holds a material interest. If there are title defects with respect to any properties, Fortune Bay might be required to compensate other persons or perhaps reduce its interest in the affected property. Also, in any such case, the investigation and resolution of title issues would divert management's time from ongoing exploration and development programs.

Risk of Amendments to Laws

Amendments to current laws, regulations and permits governing operations and activities of mining companies, or more stringent implementation thereof, could have a material adverse impact on Fortune Bay and cause increases in capital expenditures or production costs or reduction in levels of production at producing properties or require abandonment or delays in development of new mining properties.

Commodity Prices

The price of the Company's shares, Fortune Bay's financial results and exploration, development and mining activities may in the future be significantly adversely affected by declines in the price of gold or other minerals. The price of gold or other minerals fluctuates widely and is affected by numerous factors beyond Fortune Bay's control, such as the sale or purchase of commodities by various central banks and financial institutions, interest rates, exchange rates, inflation or deflation, fluctuation in the value of the United States dollar and other foreign currencies, global and regional supply and demand, the political and economic conditions of major mineral-producing countries throughout the world, and the cost of substitutes, inventory levels and carrying charges. Future serious price declines in the market value of gold or other minerals could cause continued development of and commercial production from Fortune Bay's properties to be impracticable. Depending on the price of gold and other minerals, cash flow from mining operations may not be sufficient and Fortune Bay could be forced to discontinue production and may lose its interest in, or may be forced to sell, some of its properties. Economic viability of future production from Fortune Bay's mining properties, if any, is dependent upon the prices of gold and other minerals.

In addition to adversely affecting any reserve estimates and its financial condition, declining commodity prices can impact operations by requiring a reassessment of the feasibility of a particular project. Such a reassessment may be the result of a management decision or may be required under financing arrangements related to a particular project. Even if the project is ultimately determined to be economically viable, the need to conduct such a reassessment may cause substantial delays or may interrupt operations until the reassessment can be completed.

Foreign Countries and Regulatory Requirements

Fortune Bay has investments in properties and projects located in foreign countries, including Mexico. The carrying values of these properties and Fortune Bay's ability to advance development plans or bring the projects to production may be adversely affected by whatever political instability and legal and economic uncertainty might exist in such countries. These risks may limit or disrupt Fortune Bay's projects, restrict the movement of funds or result in the deprivation of contractual rights or the taking of property by nationalization, expropriation or other means without fair compensation.

There can be no assurance that industries which are deemed of national or strategic importance in countries in which Fortune Bay has operations or assets, including mineral exploration, production and development, will not be nationalized. The risk exists that further government limitations, restrictions or requirements, not presently foreseen, will be implemented. Changes in policy that alter laws regulating the mining industry could have a material adverse effect on Fortune Bay. There can be no assurance that Fortune Bay's assets in these countries will not be subject to nationalization, requisition or confiscation, whether legitimate or not, by an authority or body.

In addition, in the event of a dispute arising from foreign operations, Fortune Bay may be subject to the exclusive jurisdiction of foreign courts or may not be successful in subjecting foreign persons to the jurisdiction of courts in Canada. Fortune Bay also may be hindered or prevented from enforcing its rights with respect to a governmental instrumentality because of the doctrine of sovereign immunity. It is not possible for Fortune Bay to accurately predict such developments or changes in laws or policy or to the extent to which any such developments or changes may have a material adverse effect on Fortune Bay's operations.

Acquisitions and Integration

From time to time, it can be expected that Fortune Bay will examine opportunities to acquire additional exploration and/or mining assets and/or businesses. Any acquisition that Fortune Bay may choose to complete may be of a significant size, may change the scale of Fortune Bay's business and operations, and may expose Fortune Bay to new geographic, political, operating, financial and geological risks. Fortune Bay's success in its acquisition activities depends upon its ability to identify suitable acquisition candidates, negotiate acceptable terms for any such acquisition, and integrate the acquired operations successfully with those of Fortune Bay. Any acquisitions would be accompanied by risks. In the event that Fortune Bay chooses to raise debt capital to finance any such acquisitions, Fortune Bay's leverage will be increased. If Fortune Bay chooses to use equity as consideration for such acquisitions, existing shareholders may suffer dilution. Alternatively, Fortune Bay may choose to finance any such acquisitions with its existing resources. There can be no assurance that Fortune Bay would be successful in overcoming these risks or any other problems encountered in connection with such acquisitions.

Internal Controls

Internal controls over financial reporting are procedures designed to provide reasonable assurance that transactions are properly authorized, assets are safeguarded against unauthorized or improper use, and transactions are properly recorded and reported. A control system, no matter how well designed and operated, can provide only reasonable, and not absolute, assurance with respect to the reliability of financial reporting and financial statement preparation.

Conflicts of Interest

Some of the directors and officers of Fortune Bay are directors and officers of other companies, some of which are in the same business as Fortune Bay. Some of Fortune Bay's directors and officers will continue to pursue the acquisition, exploration and, if warranted, the development of mineral resource properties on their own behalf and on behalf of other companies, and situations may arise where they will be in direct competition with Fortune Bay. Fortune Bay's directors and officers are required by law to act in the best interests of Fortune Bay. They may have the same obligations to the other companies in respect of which they act as directors and officers. Discharge of their obligations to Fortune Bay may result in a breach of their obligations to the other companies and, in certain circumstances, this could expose Fortune Bay to liability to those companies. Similarly, discharge by the directors and officers of their obligations to the other companies could result in a breach of their obligation to act in the best interests of Fortune Bay. Such conflicting legal obligations may expose Fortune Bay to liability to others and impair its ability to achieve its business objectives.

Influence of Third Party Stakeholders

The lands in which Fortune Bay holds an interest, or the exploration equipment and roads or other means of access which Fortune Bay intends to utilize in carrying out its work programs or general business mandates, may be subject to interests or claims by third party individuals, groups or companies. In the event that such third parties assert any claims, Fortune Bay's work programs may be delayed even if such claims are not meritorious. Such delays may result in significant financial loss and loss of opportunity for Fortune Bay.

Fluctuation in Market Value of Common Shares

The market price of the common shares can be affected by many variables not directly related to the corporate performance of Fortune Bay, including the market in which it is traded, the strength of the economy generally, the availability and attractiveness of alternative investments, and the breadth of the public market for the stock. The effect of these and other factors on the market price of common shares in the future cannot be predicted. The lack of an active public market could have a material adverse effect on the price of common shares.

Cybersecurity Risks

The Company relies on information technology systems including, without limitation, its networks, equipment, hardware, software, telecommunications, and other information technology (collectively, "IT systems"), and the IT systems of its vendors and third-party service providers, to operate its business as a whole including its exploration projects. IT systems are subject to an increasing threat of continually evolving cybersecurity risks including, without limitation, computer viruses, security breaches, and cyberattacks. In addition, the Company is subject to the risk of unauthorized access to its IT systems or its information through fraud or other means. Any cybersecurity incidents or other IT systems disruption could result in operational delays, destruction or corruption of data, security breaches, financial losses from remedial actions, the theft or other compromising of confidential or otherwise protected information, fines and lawsuits, or damage to the Company's reputation. Any such occurrence could have an adverse impact on the Company's financial condition and results of operations.

The Impact of COVID-19

The outbreak of the coronavirus ("COVID-19"), has resulted in governments around the world enacting emergency measures to reduce the spread of the virus. Equity markets have experienced volatility and uncertainty while governments and central banks have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions. The duration and global impact of COVID-19 is unknown, as is the impact of the government and central bank interventions. It is not possible to reliably estimate the impact of COVID-19 on the financial results and conditions of the Company in future periods.

DISCLOSURE CONTROLS AND PROCEDURES AND INTERNAL CONTROLS OVER FINANCIAL REPORTING

Disclosure Controls and Procedures

Disclosure controls and procedures (as such term is defined in Multilateral Instrument 52-109 – *Certification of Disclosure in Issuers' Annual and Interim Filings*) have been designed by the Company to provide reasonable assurance that:

- (a) material information relating to the Company is made known to the CEO and the CFO by others, particularly during the period in which the annual filings are being prepared; and
- (b) information required to be disclosed by the Company in its annual filings, interim filings or other reports that it files or submits under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation, and is accumulated and communicated to management, including the CEO and CFO, to allow timely decisions regarding required disclosures.

The CEO and CFO have concluded that as of the end of the period covered by this MD&A, the design and operation of the disclosure controls and procedures are effective to ensure that information required to be disclosed in reports that it files or submits to regulatory authorities is recorded, processed, summarized and reported within the time periods specified by regulation, and is accumulated and communicated to management, including our CEO and CFO, to allow timely decisions regarding required disclosures.

Internal Control over Financial Reporting

The Company's management, with the participation of its CEO and CFO, has designed, established and is maintaining a system of internal control over financial reporting. Under the supervision of the CFO, as at June 30, 2020, the Company's internal control over financial reporting is a process designed to provide reasonable assurance that the financial information prepared by the Company for external purposes is reliable and has been recorded, processed and reported in an accurate and timely manner and in accordance with IFRS.

Management, with the participation of its CEO and CFO, has used the Internal Control - Integrated Framework to evaluate the effectiveness of internal control over financial reporting, which is a recognized and suitable framework issued by the Committee of Sponsoring Organizations (COSO Framework) published by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

The Company's controls include policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with IFRS; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the annual financial statements or interim financial statements.

There have been no changes to the controls during the year that materially affected or are reasonably likely to materially affect the Company's internal control over financial reporting.

Limitations of Controls and Procedures

The Company's management, including the CEO and CFO, believe that any disclosure controls and procedures or internal controls over financial reporting, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, they cannot provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been prevented or detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by unauthorized override of the control. The design of any systems of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Accordingly, because of the inherent limitations in a cost effective control system, misstatements due to error or fraud may occur and not be detected.

CRITICAL ACCOUNTING POLICIES

The preparation of the Financial Statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. Management routinely makes judgments and estimates about the effect of matters that are inherently uncertain. As the number of variables and assumptions affecting the future resolution of the uncertainties increase, these judgments become even more subjective and complex. The Company's significant accounting policies are disclosed in Note 2, *Summary of Significant Accounting Policies*, to the December 31, 2019 audited consolidated financial statements.

The Company has identified certain accounting policies that the Company believes are most critical in understanding the judgments that are involved in producing the consolidated financial statements and the estimates made that could impact results of the operations, which are discussed below.

Impairment of long-lived assets

At the end of each reporting period, the Company reviews the carrying amounts of its long-lived assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated to determine the extent of the impairment loss, if any. Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit ("CGU") to which the asset

belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual CGU's, or otherwise they are allocated to the smallest group of CGU's for which a reasonable and consistent allocation basis can be identified.

The recoverable amount of an asset is the higher of fair value less costs to dispose and value in use. Value in use is determined by discounting the estimated future cash flows to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted. If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognized immediately in the consolidated statement of loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or a CGU) is increased to the revised estimate of its recoverable amount, however the revised carrying amount cannot exceed the asset's (or CGU's) original cost before impairment calculated as if no impairment loss had been previously recognized.

During the period ended June 30, 2020 and the year ended December 31, 2019, there were no indicators of impairment or impairment reversals on the Company's long-lived assets.

Long-lived assets - *Exploration and evaluation expenditures*

Exploration and evaluation expenditures include costs such as exploratory drilling, sample testing and the costs of pre-feasibility studies. These costs are capitalized on a project-by-project basis pending determination of the technical feasibility and commercial viability of the project. The technical feasibility and commercial viability of a project is considered to be determinable when the proposed efficiency and viability of the project is assessed and the costs are expected to be recovered in full through the successful development and exploration of the identified property. All capitalized exploration and evaluation expenditures are monitored for indications of impairment, to ensure that commercial quantities of reserves exist or that exploration activities related to the property are continuing or planned for the future. If an exploration property does not prove viable, all unrecoverable costs associated with the project are expensed.

Exploration and evaluation assets are not depreciated. These amounts are reclassified from exploration and evaluation assets to mine development costs once the work completed to date supports the future development of the property and such development receives the appropriate approval. All subsequent expenditures to ready the property for production are capitalized within mine development costs, other than those costs related to the construction of property and equipment. Once production has commenced, all assets included in mine development costs are reclassified to mining properties. Exploration and evaluation expenditures incurred prior to the Company obtaining the right to explore are recorded as expense in the period in which they are incurred.

SIGNIFICANT ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

The preparation of the consolidated financial statements requires that the Company's management make estimates and judgments about future events that affect the amounts reported in the consolidated financial statements and related notes to the consolidated financial statements. Actual results may differ from those estimates. Estimates and judgments are reviewed on an ongoing basis based on historical experience and other factors that are considered to be relevant under the circumstances. Revisions to estimates are accounted for prospectively.

The significant assumptions about the future and other major sources of estimation uncertainty as at the end of the reporting period that have a significant risk of resulting in a material adjustment to the carrying amounts of the Company's assets and liabilities are outlined in Note 3, *Significant Accounting Judgments and Key Sources of Estimation Uncertainty*, to the December 31, 2019 audited consolidated financial statements of the Company.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS AND INFORMATION

This MD&A contains "forward-looking information", as such term is defined in applicable Canadian securities legislation. Forward-looking information is necessarily based on a number of estimates and assumptions that are inherently subject to significant business, economic and competitive uncertainties and contingencies. All statements other than statements which are reporting results as well as statements of historical fact set forth or incorporated herein by reference, are forward looking information that may involve a number of known and unknown risks, uncertainties and other factors, many of which are beyond the Company's ability to control or predict. Forward-looking information can be identified by the use of words such as "may," "should," "expects," "plans," "anticipates," "believes," "estimates," "predicts," "intends," "continue," or the negative of such terms, or other comparable terminology.

This information includes, but is not limited to comments regarding:

- the Company's exploration and development plans for the exploration properties;
- liquidity to support operations;
- completion of a NI 43-101 report for any of the exploration properties;
- the establishment and estimates of additional mineral resources;
- anticipated expenditures for development, exploration and corporate overhead;
- timing and issuance of any permits;
- estimates of closure costs and reclamation liabilities;
- the Company's ability to continue as a going concern;
- the Company's ability to obtain financing to fund future expenditure and capital requirements;
- and
- the impact of adoption of new accounting standards.

Although the Company believes that the plans, intentions and expectations reflected in this forward-looking information are reasonable, the Company cannot be certain that these plans, intentions or expectations will be achieved. Actual results, performance or achievements could differ materially from those contemplated, expressed or implied by the forward-looking information contained in this report. Disclosure of important factors that could cause actual results to differ materially from the Company's plans, intentions or expectations is included in this report under the heading "Risk Factors".

Forward-looking information inherently involves risks and uncertainties that could cause actual results to differ materially from the forward-looking information. Factors that could cause or contribute to such differences include, but are not limited to unexpected changes in business and economic conditions, including the global financial and capital markets; significant increases or decreases in gold prices; changes in interest and currency exchange rates; changes in operating costs; results of current and future exploration and development activities; results of future feasibility studies; joint venture relationships; political or economic instability, either globally or in the countries in which the Company operates; local and community impacts and issues; timing of receipt of government approvals; accidents and labour disputes; environmental costs and risks; competitive factors, including competition for property acquisitions; availability of external financing at reasonable rates or at all; and the factors discussed in this MD&A under the heading "Risk Factors".

Many of these factors are beyond the Company's ability to control or predict. These factors are not intended to represent a complete list of the general or specific factors that may affect the Company. The Company may note additional factors elsewhere in this MD&A. All forward-looking statements and information speak only as of the date made. All subsequent written and oral forward-looking statements attributable to the Company, or persons acting on the Company's behalf, are expressly qualified in their entirety by these cautionary statements. Readers are cautioned not to put undue reliance on forward-looking information due to the inherent uncertainty therein. Fortune Bay disclaims any intent or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or results or otherwise except as required by securities legislation.

CAUTIONARY NOTE REGARDING HISTORICAL MINERAL RESOURCE AND RESERVE ESTIMATES

The mineral resource and reserve estimates for the Goldfields and Ixhuatán projects are considered historical in accordance with NI 43-101. A Qualified Person has not done sufficient work to classify the historical estimates as current mineral resources or mineral reserves, and the Company is not treating the historical estimate as current mineral resources or mineral reserves. While the estimates were prepared in accordance with NI 43-101, and CIM Standards on Mineral Resources and Reserves: Definitions and Guidelines in effect at the time, there is no guarantee that it would be consistent with current standards and it should not be regarded as such. Fortune Bay has not undertaken any independent verification of the data upon which the historical estimates are based. The historical estimates are considered relevant to assess the mineralization and economic potential of the Goldfields and Ixhuatán projects.

Technical Reports

The mineral resource and reserve estimates for the Goldfields project are contained in the Technical Report titled "NI 43-101 Technical Report Pre-Feasibility Study, Brigus Gold Corp., Goldfields Project, Saskatchewan, Canada" with an effective date of October 6, 2011 (the "2011 PFS Technical Report"), prepared by March Consulting Associates Inc. in cooperation with Wardrop (now Tetra Tech), Dan Mackie Associates (DMA) and EHA Engineering Ltd. The 2011 PFS Technical Report was issued to Brigus Gold Corp. ("Brigus"), and subsequently re-issued to successor company, Fortune Bay Corp. on March 13, 2014. The 2011 PFS Technical Report is filed on SEDAR (www.sedar.com) under Brigus's issuer profile.

The mineral resource estimate for the Ixhuatán project is contained in the Technical Report titled "2006 Resource Estimation Campamento Gold Project on the Ixhuatan Property, Chiapas State, Mexico" with an effective date of June 22, 2006, prepared by Gary H. Giroux, P.Eng for Linear Gold Corp. ("Linear"), a predecessor company of Fortune Bay. A more recent Technical Report titled "2011 Summary Report on the Ixhuatán Advanced Stage Gold Project, Chiapas State, Mexico" (the "2011 Summary Report") with an effective date of May 18, 2011, was prepared by Philip K. Seccombe, PhD, MAIG of Equity Exploration Consultants Ltd. and Gary H. Giroux, P.Eng. The 2011 Summary Report was prepared for Cangold Limited ("Cangold") who previously optioned the property from Brigus (successor to Linear). The report provided an updated review of the project and included the mineral resource estimate from the 2006 Resource Estimate Report since no further holes had been drilled in the resource area since 2006. The 2011 Summary Report is filed on SEDAR (www.sedar.com) under Cangold's issuer profile.

Disclosure of Historical Estimates

In accordance with Section 2.4 NI 43-101, and despite section 2.2, an issuer may disclose an historical estimate, using the original terminology, if the disclosure identifies the following:

	Goldfields – Box and Athona Deposits	Ixhuátan – Campamento Deposit
Source and date of the historical estimate, including any existing technical report	NI 43-101 Technical Report Pre-feasibility Study Brigus Gold Corp. Goldfields Project, Saskatchewan, Canada (the “2011 PFS Technical Report”) prepared by March Consulting Associates Inc. in cooperation with Wardrop, DMA and EHA with an effective date of October 6, 2011. This report included an updated mineral resource estimate for Box, and restated a previous mineral resource for Athona, derived from a previous NI 43-101 report titled “Technical Report on the Athona Deposit, SK” with an effective date of May 17, 2007, completed by Wardrop Engineering Inc. (now Tetra Tech). No additional drilling or evaluation work was completed on Athona between 2007 and 2011.	NI 43-101 Technical Report 2006 Resource Estimation, Campamento Gold Project on the Ixhuátan Property, Chiapas State, Mexico (the “2006 Resource Estimate Report”) for Linear Gold Corp. by G. H. Giroux, MASc, PEng. with an effective date of June 22, 2006.
Relevance and reliability of the historical estimate	The 2011 PFS Technical Report was compiled in accordance with Canadian Institute of Mining (2005) standards and best practices for Mineral Resources, adhering to the NI 43-101 Standards of Disclosure for Mineral Projects. Supporting resource data were subjected to quality control by the responsible Qualified Person.	The 2006 Resource Estimate Report was compiled in accordance with Canadian Institute of Mining (2005) standards and best practices for Mineral Resources, adhering to the NI 43-101 Standards of Disclosure for Mineral Projects. Supporting resource data were subjected to quality control by the responsible Qualified Person.
Key assumptions, parameters, and methods used to prepare the historical estimate	Supporting resource data for the Box deposit included 434 drill holes totalling 58,458 m (approximate 25 m grid spacing) with 21,611 gold assay results. Capped and composited (3 m) gold grade (g/t) was interpolated by Ordinary Kriging into a block model further constrained by a 3-D model of the mineralization extent. Resource classification (confidence) was assigned based on distance to historical mine workings and drill coverage. A similar approach was applied to the Athona deposit, for which the resource data included 279 drill holes totalling 25,491 m with 12,660 gold assay results.	Supporting resource data included 94 drill holes totalling 17,956 m with 8,372 gold assay results. Composited (5 m) gold grade (g/t) was interpolated into a block model further constrained by a 3-D model of the mineralization extent using semivariogram and search parameters that were optimized to fit known structural controls on mineralization. Resource classification (confidence) was assigned based on distance to drill coverage and interpretations of grade continuity based on semivariogram analysis.
Resource categories used	In accordance with NI 43-101 the Goldfields and Ixhuátan historical mineral resource estimates use the terms “mineral resource”, “inferred mineral resource”, “indicated mineral resource” and “measured mineral resource” having the same meanings ascribed to those terms by the Canadian Institute of Mining, Metallurgy and Petroleum, as the CIM Definition Standards on Mineral Resources and Mineral Reserves adopted by CIM Council, as amended.	
More recent estimates or data available to the issuer	No relevant drilling or assay work has been conducted since 2011. A metallurgical study was carried out by SGS Canada Inc. in 2016 on historical drill core. This study confirmed	No relevant drilling or assay work has been conducted since 2006 on the Campamento Deposit.

	upside to the recovery assumptions used in the 2011 technical report.	
Work that needs to be done to upgrade or verify the historical estimate as current mineral resources or mineral reserves;	An independent Qualified Person will be required to review and validate the historical data and historical estimates and compile an updated current Technical Report in accordance with NI 43-101. It is envisaged that this will involve an update/refinement to the geological model and grade interpolation methods.	An independent Qualified Person will be required to review and validate the historical data and historical estimates and compile an updated current Technical Report in accordance with NI 43-101.

TECHNICAL INFORMATION

NI 43-101 requires, among other things, that issuers ensure that all written disclosure of a scientific or technical nature concerning a mineral project on a property material to the issuer identifies and discloses the relationship to the issuer of the qualified person who prepared or supervised the preparation of the technical report or other information that forms the basis for the written disclosure. A "qualified person" for purposes of NI 43-101 means an individual who is an engineer or geoscientist with at least five years of experience in mineral exploration, mine development or operation and/or mineral project assessment, has experience relevant to the subject matter of the disclosure and is a member in good standing of a specified professional association. The technical and scientific information in this MD&A has been reviewed and approved by Dale Verran, M.Sc., P.Geo., Chief Executive Officer for Fortune Bay Corp., who is a Qualified Person as defined by NI 43-101. Mr. Verran is an employee of Fortune Bay and is not independent of the Company under NI 43-101.

OFFICER CHANGES AND OTHER INFORMATION

Effective June 15, 2020, Mr. Dale Verran has been appointed as Chief Executive Officer of the Company. Mr. Wade Dawe stepped down as Chief Executive Officer but remains with the Company as Executive Chairman.

Additional information regarding the Company is available on SEDAR at www.sedar.com and on the Company's website at www.fortunebaycorp.com.
